EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Roy Rhee on 11/13/2007.

The application has been amended as follows: Claim 17 recites, "A method of efficiently decoding MPEG video bit streams, comprising: determining the type of MPEG video received; and implementing a first number of video frame buffers based on said type of MPEG video received, said decoding performed to implement a reverse play or slow rewind function." Cancel claims 25-38.

2. The following is an examiner's statement of reasons for allowance: The present invention is directed towards a system to efficiently process MPEG video in order to perform a reverse play by reducing system bandwidth and maximizes the use of memory resources. Independent claims identify the uniquely distinct feature, "number of video frame buffers implemented based on said type of said MPEG video received." The closest prior art fails to anticipate or render to the above underlined limitations above.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 2621

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Any inquiry concerning this communication or earlier communications from the examiner should be directed to Mishawn N. Dunn whose telephone number is 571-272-7635. The examiner can normally be reached on Monday - Friday 7:30 AM to 5:00 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Thai Tran can be reached on 571-272-7382. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only.
